At what point does a person feel comfortable? Masks help, masks do nothing....we hear both but masks keep out bacteria not virus, my daughter in health care has to double mask and shield. The shot was supposed to let people go mask free. Herd immunity was supposed to help us go mask free. I'm not feeling that our county commissioner's are leading from the front to let Charles County residents know we will get through this . I feel mandates create hysteria and arguments and false hope that a piece of cloth will prevent the spread. I watch people fiddle with their face and mask endless times. Choice will give us a sense of normalcy and many will choose to wear masks and many will choose not to and people will accept that. I go to King George , Calvert and St Mary's and they function well without mandates ,I guess Charles County covid is different then everywhere else. I thought the shot works, saying the mask is needed doesn't support that. A small business is going to do what it takes to keep their clients feel safe. We space out, clean , wash our hands and take any precautions necessary.
