- VII. Matches cancelled during the first half of play will be rescheduled in their entirety. Matches cancelled during halftime will be continued from that point (score remains same when match is rescheduled). Matches cancelled after the start of the second half will be counted as a complete match.
- VIII. **Thunder and Lightning** - If thunder and/or lightning can be seen or heard, participants, spectators and staff are in danger. The contests must be stopped, and protective shelter sought immediately. If either situation should occur, **30 minutes** will be allowed to pass after the last sound of thunder and/or lightning (before the contest may resume).
- IX. **Safety Concerns - Heat Policy** - There is considerable danger concerning heat stress/exhaustion during outdoor physical activities which occur during late spring, summer, and early fall. All athletes are at risk and the necessary precautions need to be taken for all sports. All participants should be monitored closely.

- X. Coaches shall pay particular attention to extreme weather conditions and adjust practice schedules when appropriate. When the heat index (air temperature plus relative humidity) reaches 84 degrees or higher, the following restrictions listed below must be followed:

HEAT INDEX READING	RESTRICTION
105+ degrees	DANGER! Discontinue regular practice. Very short restricted practice is permitted. Make sure all athletes drink water.
95 - 104 degrees	EXTREME CAUTION! Modify practice with required water breaks every 30 minutes. Observe athletes carefully for signs of heat injuries. Make sure all athletes drink water.
84 - 93 degrees	WARNING! Provide a mandatory ten (10) minute rest per 45 minutes of activity. Water is to be available at all times.
Below 83 degrees	NO RESTRICTIONS. Monitor the heat index for increases. Water is to be available at all times.

CONCUSSION FACT SHEET

WHAT IS A CONCUSSION?

A concussion is an injury that changes how the cells in the brain normally work. A concussion is caused by a blow to the head or body that causes the brain to move rapidly inside the skull. Even a “ding”, “getting your bell rung”, or what seems to be a mild bump or blow to the head can be serious.

Concussions can also result from a fall or from players colliding with each other or with obstacles, such as a goalpost, even if they do not directly hit their head.

The potential for concussions is the greatest in athletic environments where collisions are common.

Concussions can occur, however, in any organized or unorganized sport or recreational activity. As many as 3.8 million sports and recreation-related concussions occur in the United States each year.

WHAT ARE THE SIGNS AND SYMPTOMS OF A CONCUSSION?

If your child has experienced a bump or blow to the head during a match or practice, look for any of the following signs and symptoms of a concussion:

Signs Observed by Parents or Guardians

- Appears dazed or stunned
- Is confused about assignment or position
- Forgets an instruction
- Is unsure of match, score, or opponent

- Moves clumsily
- Answers questions slowly
- Loses consciousness (even briefly)
- Shows behavior or personality changes
- Cannot recall events prior to hit or fall
- Cannot recall events after hit or fall

Symptoms Reported by Athlete

- Headache or “pressure” in head
- Nausea or vomiting
- Balance problems or dizziness
- Double or blurry vision
- Sensitivity to light
- Sensitivity to noise
- Feeling sluggish, hazy, foggy, or groggy
- Concentration or memory problems
- Confusion
- Does not “feel right”

HOW CAN YOU HELP YOUR CHILD PREVENT A CONCUSSION?

Every sport is different, but there are steps your children can take to protect themselves from concussion

- Ensure that they follow their coach’s rules for safety and the rules of the sport
- Encourage them to practice good sportsmanship at all times
- Make sure they wear the right protective equipment for their activity. Protective equipment should fit properly, be well maintained, and be worn consistently and correctly
- Learn the signs and symptoms of concussion.

WHAT SHOULD YOU DO IF YOU THINK YOUR CHILD HAS A CONCUSSION?

- **Seek medical attention right away** o A health care professional will be able to decide how serious the concussion is and when it is safe for your child to return to sports
- **Keep your child out of play**
 - o Concussions take time to heal. Don’t let your child return to play until a health care professional says it’s ok. Children who return to play too soon – while the brain is still healing – risk a greater chance of having a second concussion. Second or later concussions can be very serious. They can cause permanent brain damage, affecting your child for a lifetime.
- **Tell your child’s coach about any recent concussion** o Coaches should know if your child had a recent concussion in ANY sport. Your child’s coach may not know about a concussion your child received in another sport or activity unless you tell the coach.

Remember, you can’t always see a concussion and some athletes may not experience and/or report symptoms until hours or days after the injury. It’s better to miss one match than the whole season.
