

PROPOSED CAPITAL IMPROVEMENT PROGRAM

FISCAL YEAR 2025

(\$ in thousands)

PROJECT NAME: Automation & Technology Master Plan	Water User Water Connection Sewer User Sewer Connection	50.0%	Requested By: DPW Project #:
<p>This project is the result of an extensive study to determine the Information Technology needs of the Utilities Division in order to bring it into the 21st century. The project includes emphasis on Supervisor, Control, and Data Acquisition (SCADA), regulatory compliance, data management, work management, and performance management, among other issues. The ultimate goal of this project is for the Department of Public Works - Utilities to accomplish its functions even in periods of growth without adding field staff and to make more efficient use of the resources currently available.</p>			
<p>Planning Commission Comments: Maintenance or upgrade of existing facilities, Consistent (Rating #2)</p>

PROPOSED CAPITAL IMPROVEMENT PROGRAM

FISCAL YEAR 2025

(\$ in thousands)

PROJECT NAME: Bel Alton and Chapel Point Interconnection	Water User 100%	Water Connection 0%	Requested By: DPW
<p>This project will cooperatively extend the Town of La Plata water system to the Chapel Pt. and Bel Alton areas, including the Charles County Fairgrounds. This project also includes installation of a 250,000 gallon elevated storage tank in Chapel Pt. area to support the water system. This is part of a phased approach to interconnect the Waldorf Water System with satellite water systems in the southern region of the County to continue to provide a healthy, sustainable water supply. This project will also help control rising costs associated with operating and maintaining multiple small satellite community water systems once the interconnection is completed.</p>			
<p>Planning Commission Comments: Project is consistent with Comprehensive Plan. (Rating #1)</p>

PROPOSED CAPITAL IMPROVEMENT PROGRAM

FISCAL YEAR 2025

(\$ in thousands)

PROJECT NAME: Potomac River Water Supply Treatment Plant	Water User 50%	Requested By: PGM	
Design, land acquisition and construction for a new 5-10 MGD surface water treatment plant along the upper reaches of the Potomac River. Project includes upsizing of the existing transmission main in the Waldorf system and a new transmission line to convey Potomac River supply to the Bryans Road and Waldorf systems. Phase A-2 of the Charles County Water Source Feasibility study was completed in October 2018. Results from the study recommended short-term and long-term water supply options. The project will provide future (long term) projected average and maximum day demands.

PROJECT NAME: Mattawoman Infiltration and Inflow PH II	Sewer User Sewer Connection	60% 40%	Requested By: DPW
<p>The Mattawoman WWTP service area has high Inflow and Infiltration (I/I) during storm events entering the sanitary sewer causing sanitary sewer overflows (SSOs) where system capacity is not sufficient. SSOs range from backups into basements to overflows from the sewer manholes. In addition to being a public health risk, it is also a regulatory issue. This project will provide information on the condition of the Mattawoman sewer system, identify areas where I/I already exists or a high I/I potential exists, and design/construct repairs for I/I removal. This project will also investigate feasibility of providing in-line storage for flow equalization; identify locations for design and construction projects to implement the in-line flow equalization and acquisition of right of way needed to implement the projects. The repairs proposed will address the sewer basins with the highest I/I severity (Tier 1) resulting in the greatest amount of I/I removal for the lowest cost. This project will be on-going multi-year endeavor.</p>			

Planning Commission Comments: Maintenance or upgrade of existing facilities, Consistent (Rating #2)

PROPOSED CAPITAL IMPROVEMENT PROGRAM

FISCAL YEAR 2025

(\$ in thousands)

<p>PROJECT NAME: MWWTP Utility Water System Evaluation & Improvement</p> <p>The plant utility water system has not always been satisfactory in supporting all of the demands for Non-Potable Water (NPW) at the MWWTP. Sludge production and other needs for NPW have increased over the years. Low NPW pressures have been experienced throughout the plant and the sludge dewatering process has been negatively affected as a result. Evaluation of the plant utility water system is needed to determine what improvements are necessary in order to satisfy the plant NPW demands. The effect of the UV upgrade was to cut the system from a 4 pump system to a 2 pump system, and it has become a common occurrence to have to defer wash-downs in other areas of the plant in order to operate the belt filter presses or vice versa.</p>	<p style="text-align: center;">Sewer User Sewer Connection</p> <p style="text-align: center;">60% 40%</p> <p style="text-align: right;">Requested By: DPW</p>
<p>Planning Commission Comments: Maintenance or upgrade of existing facilities, Consistent (Rating #2)</p>	

VARIANCE TO APPROVED PER FY24-FY28 CAPITAL IMPROVEMENT PROGRAM:

PROPOSED CAPITAL IMPROVEMENT PROGRAM

FISCAL YEAR 2025

(\$ in thousands)

PROJECT NAME: Zekiah Pump Station Force main	Sewer User 0%	0% Sewer Connection 100%	Requested By: PGM
Design and construct approximately 4,000 l.f. of 18" force main from Zekiah Pump Station. This project is necessary to accommodate the increased flows generated when the Zekiah Pump Station is upgraded to 6.0 MGD. The new force main will run from the existing Zekiah Pump Station along Acton Lane to the intersection of Acton Lane and U.S. Route 301.			
Planning Commission Comments: Project is consistent with Comprehensive Plan. (Rating #1)
