EPIDEMIOLOGY AND SURVEILLANCE

SURVEILLANCE OF ED HOSPITAL DATA AND URGENT CARE THROUGH ESSENCE

ESSENCE data for urgent care utilization at Patient First in Waldorf had no data warnings or alerts for Tuesday, April 7th. Patient volume was 30 on 4/7, similar to patient volume on 4/6. All were discharged to home for self-care. 6 presented with ILI on Tuesday. Diagnoses included sinusitis, bronchitis, common cold, shortness of breath, asthma exacerbation, and unspecified pneumonia. One case was tagged with the CDC CCDD Classifier for Pneumonia. This allows the state and county to easily track all cases of pneumonia in ESSENCE and helps to determine the yellow and red alerts mentioned above.

ESSENCE ED visit data for the University of Maryland Charles Regional Medical Center also shows no high utilization alerts or warnings for 4/7. There were 46 ED patients on 4/7. The epidemiologist read the reports on each case where the chief complaint included flu like or possible COVID-19 symptoms (N=8 for 4/7). COVID-19 case or COVID-19 PUI was listed in the provider diagnosis and notes for 2 cases. ESSENCE does not indicate any admissions; however, the discharge disposition was left as "none" for 19 people. No deaths were noted in ESSENCE ED data for 4/7. Three cases were tagged with the CDC CCDD Classifier for Pneumonia, and one case was tagged with the CDC CCDD Classifier for Fever and Cough and SOB. This allows the state and county to easily track all cases of pneumonia and influenza-like illness in ESSENCE and helps to determine the yellow and red alerts mentioned above

SURVEILLANCE OF EMS CALL DATA AND ALERTS

The epidemiologist monitors the Charles County DES First Watch trigger alerts. The number of daily trigger alerts for COVID-19 cases or COVID-19 persons under investigation saw a decrease from Monday 4/6 to Tuesday, 4/7.
