Coronavirus (COVID-19) Pandemic:
Purchase and Distribution of Food Eligible for Public Assistance

Due to the impact of the COVID-19 pandemic, it may be necessary as an emergency protective measure to provide food to meet the immediate needs of those who do not have access to food and to protect the public from the spread of the virus. On April 11, 2020, FEMA issued a new policy that addresses the purchase and distribution of food eligible for Public Assistance funding under emergency and major disaster declarations for the COVID-19 pandemic.

State, local, tribal, and territorial (SLTT) governments with the legal responsibility for protecting life, public health and safety are eligible applicants for assistance related to the purchase and distribution of food.

SLTT applicants may enter into formal agreements or contracts with private organizations, including private nonprofit organizations such as food banks, to purchase and distribute food when necessary as an emergency protective measure in response to the COVID-19 pandemic. In these cases, Public Assistance funding is provided to the legally responsible government entity, which would then reimburse the private organization for services under the agreement or contract.

All costs must be reasonable and are subject to standard Public Assistance program eligibility and other federal requirements, as well as the prevailing cost-share requirement for the respective COVID-19 emergency or major disaster declaration.

This form of assistance is time-limited with additional information outlined in the policy.

FEMA will engage with interagency partners, including the U.S. Department of Agriculture, the U.S. Department of Health and Human Services, and U.S. Department of Housing and Urban Development, to ensure this assistance does not duplicate other available assistance.

Surveillance of EMS call data and alerts

The epidemiologist monitors the Charles County DES First Watch trigger alerts. The number of daily trigger alerts for COVID-19 cases or COVID-19 persons under investigation was 26 on 4/16. Discussions with Robbie Jones from EMS reveal data issues with the alert system. The decrease in COVID-19 PUI alerts does not indicate a decrease in call volume. The epidemiologist has also noticed potential COVID-19 PUI that came as regular trigger alerts. Data issues are being worked.
4/16: 26

Racial breakdown

CCPS instructional staff is putting lesson plans and materials in place for the extension. The materials launched online 4-17-20 on our website, www.ccboe.com , and in paper packets provided at our 11 meal sites cover Weeks 3 and 4. CCPS will soon update parents on how the distance learning materials will be collected and graded. We will continue to feed all children ages 18 and younger at our meal sites. We will continue to provide distance learning lessons for students. This includes helping our students with additional needs, such as special education students and students who receive English as a Second Language services. We ask all parents in need of a laptop for their child to file a ticket under the Request a Laptop link on Ask CCPS. In order for us to configure laptops for students in need, all requests must be submitted by April 24.
