

Charles County COVID-19

Incident Action Plan

Operational Period

From
4/21/20
8:00

To
4/23/20
8:00

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name Charles County COVID-19	2. Operational Period	Date From: 4/21/20 Date To: 4/23/20 Time From: 8:00 Time To: 8:00															
3. Objectives																	
<p>A. Ensure the safety and overall health and well-being, including mental health of the residents, county employees, and responders, throughout this incident.</p> <p>B. Conduct surveillance of COVID-19 cases in collaboration with the health department, hospital, physicians, and other health care providers.</p> <p>C. Maintain timely, accurate and uniform communications with residents, employees and first responders as well as partners in the tri-County and National Capital Region and the state of Maryland.</p> <p>D. Prepare for and handle the human reaction crisis contingencies in long terms.</p> <p>E. Prepare for long term order maintenance.</p> <p>F. Prepare for and sustain our communities' hierarchy of needs throughout this incident.</p> <p>G. Determine trigger points for Continuity of Operations for all agencies, including government, public safety, schools, hospital, and other critical infrastructure systems.</p> <p>H. Ensure all practical steps to "Slow the Spread" of transmission of COVID-19.</p>																	
4. Operational Period Command Emphasis																	
<p>Use the recommended PPE on all calls, take all the necessary precautions. PPE recommendations need to be followed 100% especially in nursing homes, and areas with groups of non-ambulatory patients.</p>																	
General Situational Awareness <p>"Wipe the Wheel. Stay Safe! Do not cross contaminate!"</p>																	
5. Site Safety Plan Required? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No Approved Site Safety Plan(s) Located at:

SAFETY MESSAGE/PLAN (ICS 208)

1. Incident Name Charles County COVID-19	2. Operational Period	Date From: 4/21/20	Date To: 4/23/20
		Time From: 8:00	Time To: 8:00
3. Safety Message/Expanded Safety Message, Safety Plan, Site Safety Plan: <p style="text-align: center;">"Wipe the Wheel. Stay safe, don't cross contaminate!"</p> <p>1. Total identified PUI's transported as of 4/20: 374 Total # of patients testing positive : 68</p> <p>2. PPE stockpiles remain stable with an estimated supply range of 10+ days based on current call volumes.</p> <p>3. Revision to EMSOP Special Order 2020-01 Version 4.0 has been completed and disseminated to staff.</p> <p>4. As this is a rapidly changing landscape, leaders should review any changes with their personnel each morning.</p> <p>5. Speical Order 2020-04 Version 1.0 was released today. New guidelines for personnel at the beginning of their shift, end of their shift and at the station.</p> <p>6. Personnel who report having a fever, sore throat, cough or other respiratory related symptoms should stay at home and self-isolate until they are symptom free for a period of 72 hours.</p> <p>7. The County's Peer Support Team has been activated and will make weekly wellness checks with our County's first responders. We are working through the logisitcs but will provide an email address and phone number to contact the team. Will disseminate when we have the contact information.</p> <p>8. Please remember that PPE caches are for EVERYONE. We are all in this TOGETHER so there is NO career and volunteer PPE caches.</p> <p>9. Under the approval of the EOC and to keep congruent with the CDC and Governor Hogan's reccomendations, Safety has approved the use of simple face masks (commercial or crafted) in the public arena. Per SOP, N95's are to be used for all patient contacts with reuse guidelines in place per the CDC recomendations.</p> <p>10. PARTNER/STAKEHOLDER OUTREACH

ALL-PARTNER

- The all-partner call will be held Thursday, April 23 at 4 p.m.

LTC/AL

- The Long-Term Care and Assisted Living call will be held, Thursday, April 23 at 3 p.m.

EPI SURVEILLANCE PROFILE FOR STATE

Case Investigation, Surveillance, and Infectious Disease Response (D, Blythe)

- 1) Latest case counts – total: 13,684
- 2) New cases 854
 - a) Age distribution:
 - i) under 18 years - 2 %
 - ii) in 18-64 age range 74%
 - iii) in 65+ age range 24%
 - b) Geographic distribution
 - i) National Capital 53%
 - ii) Baltimore Metro area 41%
 - iii) Eastern Shore 3%
 - iv) Southern 2%
 - v) Western 1%
 - c) Of cases, 54 % female;
 - d) Hospitalizations 128 new; total 3014 (22%)
 - e) Deaths -- Total 516
 - f) Release from isolation – 917 (6%)
 - g) OB 203 active; 2681cases; 153 in NH and AL; increase in group homes OB's

CONFIDENTIAL – (INFORMATION BELOW IS FOR CORE PLANNING GROUP ONLY)

RESOURCE DISTRIBUTION

- 5 orders received 4/17/2020
- 4 orders fulfilled / 1 not fulfilled and will be returned to DES Logistics – item unavailable

VOLUNTEERS

MARYLAND MEDICAL RESERVE CORPS

- 4 responders as of 4/17/2020; accepted into unit 04/18/2020
- State MRC issued a statewide availability request for volunteers to serve: Caregiver Service Team Mission

CSC Caregiver

The Maryland Department of Aging and Maryland Department of Health have implemented a new Caregiver Service Corps, with a goal of enabling older adults to remain safely in their homes and giving them piece of mind that they have a support system in place.

TESTING

VEIP TESTING SITE UPDATE

- Tested to Date as of 4/17/20 (TTD): 278
- Operational period: Week of April 20/Tuesday, April 21 and Thursday, April 23
- State to confirms availability of 100 kits; appointments then opened in CRISP

EPIDEMIOLOGY AND SURVEILLANCE

Charles County

- As of 4/20 at 1030 am, total case count for Charles County was 392 cases.
- There have been 25 deaths associated with COVID-19 (6%).
- Average age of fatalities: 75 years
- Recovered and released from isolation: 27
- Partially recovered with improved symptoms: 7
- 94 or 24% hospitalization
- 61% Female; 39% Male
- 16% Healthcare Workers
- 35% have underlying health conditions
- Age range of positive COVID-19 cases: 2-100 years

Age Distribution for Charles County cases

- Under 18 years: 1%
- 18-64 years: 79%
- 65+ years: 20

ESSENCE data for urgent care utilization at Patient First in Waldorf had no data warnings or alerts for Saturday, April 18th or Sunday, April 19th. Patient volume was 31 on 4/18 and 25 on 4/19. Patient volume remains fairly consistent each day. All were discharged to home for self-care. 7 presented with ILI or COVID-19 like symptoms on Saturday and 8 on Sunday. One case presented for an exposure to a COVID-19 confirmed case. Diagnoses included bronchitis, unspecified cough, unspecified chest pain, sinusitis, allergic rhinitis, acute maxillary sinusitis, shortness of breath, exposure to a communicable disease, nasal congestion, pneumonia, and acute pharyngitis. On Saturday, there were two cases that were tagged with CDC Classifiers for ILI negative flu, and one case tagged for Coronavirus. On Sunday, one case was tagged with a CDC Classifier for Visit of Interest due to their COVID-19 exposure, and another case was tagged with CDC Classifiers for Pneumonia, ILI Negative Flu, and Coronavirus.

Surveillance of EMS call data and alerts

The epidemiologist monitors the Charles County DES First Watch trigger alerts. The number of daily trigger alerts for COVID-19 cases or COVID-19 persons under investigation was 18 on 4/18 and 23 for 4/19. Discussions with Robbie Jones from EMS reveal data issues with the alert system. The decrease in COVID-19 PUI alerts does not indicate a decrease in call volume. The epidemiologist has also noticed potential COVID-19 PUI that came as regular trigger alerts. Robbie said that they have to fix each tablet in order to fix the problem and have more accurate data.

4/18: 18

4/19: 23

Racial breakdown

Total: 392 cases on 4/20 at 1030 am MDH line list assessed through REDCap:

(Case counts with less than 7 cases should not be shared publicly. This data is confidential.)

- Asian: 8 (2%)
- Black/African American: 178 (45.4%)

- White: 82 (21.0%)
- Other: 16 (4%)
- Two or more races: 1 (0.3%)
- Data not available: 107 (27.3%)

Ethnicity breakdown

- Hispanic 6 (1.5%)
- Non-Hispanic 268 (68.4%)
- Declined to answer 39 (10%)
- Data not available 79 (20.1%)

Epidemiologist note: *Please use caution when drawing any conclusions regarding race or ethnicity. Nearly one-third of race data is not available, and information regarding this missing population cannot be assumed. Additionally, it should be noted that the greatest number of cases (57%) are the Waldorf zip codes of 20601, 20602, and 20603. Over half of the county population lives in those zip codes. Additionally, those zip codes have a very diverse population with minority populations comprising the majority of the zip code level population and with African Americans being the largest racial group in those zip codes.*

Zip Code breakdown

Zip Code level data was also analyzed using the MDH line lists of confirmed cases in REDCap. Data was accessed on 4/20 at 9:30 am with 337 cases as the total count at that moment in time. Data for all zip code with a case count greater than 7 has been included in the attached GIS map. *(Zip code level data with counts less than 7 cases cannot be shared publicly and must remain confidential.)*

Confirmed cases by zip code:

20601: 52

20602: 71

20603: 99

20607: 9

Confirmed COVID-19 Cases

Please note: Numbers are of cases reported to MDH - Maryland residents only.
As with all reports, do not distribute this information publicly.

Total Cases Statewide: 13,357

New Cases in Last 24 Hours: 751

Number of Cases for Selected Area/Demographics: 366

This graph shows confirmed cases and cumulative cases by day of specimen collection. Daily totals will change as test results are released.

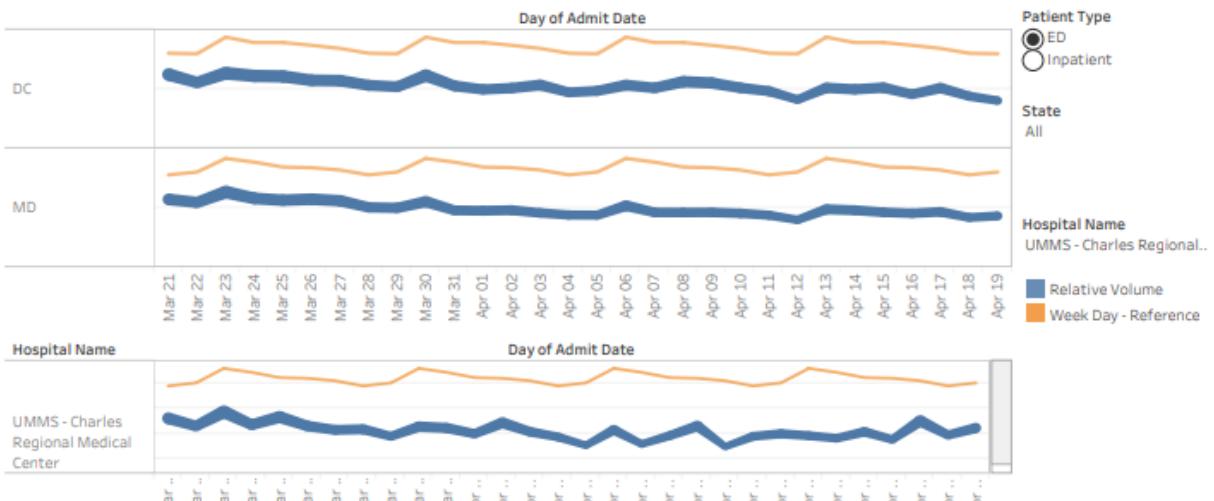

Date shown is the sample collection date, not the date when the test result was confirmed. Daily totals may change as pending tests are reported. Test Result Pending dates are greyed out in the chart

• Hospital Volume Trends ED

Hospital Volume Trend Lines

These volume data are derived from real-time Admission/Discharge/Transfer feeds sent to CRISP. The thickness of the line is a measure of volume. These volume counts are imprecise for reasons such as differences in how feeds are implemented among hospitals. However, the trendlines provide utility in understanding directional volume change over time.

The orange reference line shows the statewide average relative volume by the day of the week, using all ADT data from January 1, 2020 to February 29, 2020.

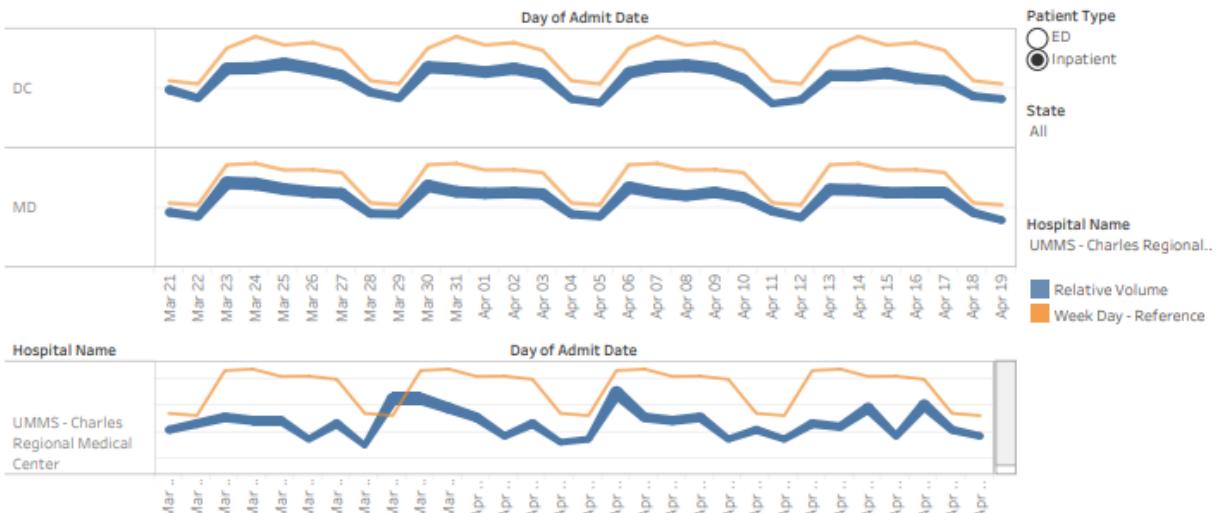

• Hospital Volume Trends Inpatient

Hospital Volume Trend Lines

These volume data are derived from real-time Admission/Discharge/Transfer feeds sent to CRISP. The thickness of the line is a measure of volume. These volume counts are imprecise for reasons such as differences in how feeds are implemented among hospitals. However, the trendlines provide utility in understanding directional volume change over time.

The orange reference line shows the statewide average relative volume by the day of the week, using all ADT data from January 1, 2020 to February 29, 2020.

Nothing new to report

Respectfully submitted by Charles County PHEP

CC DES Peer Support Services Weekly Report

April 20, 2020

Face-to-Face visits:

33 employees

2 volunteers at Station 60

2 volunteers at Station 8

Phone Contacts:

39 phone contacts

Social Media:

Courtney and Debi continue to monitor FaceBook. Several posts have been made to encourage self-care.

CISM:

A CISM meeting was held Monday, April 13, 2020 for Academy Class VI regarding Marcus Paxton's death. A total of 8 from the class showed up and participated.

Peer Support/CISM open forum meetings were set for Thursday, April 16, 2020, and Friday, April 17, 2020. No employees attended. These meetings fell just after employees learned of the Station 12 outbreak and our 2 employees testing positive.

General Impression:

This week has definitely been one of the hardest for this group since we have started checking-in on our employees. People are starting to reach their breaking point. They are afraid, tired and angry. It is a cumulative of the stress of the unknown and constantly changing COVID-19, altered lives, co-workers testing positive, volunteer station having multiple testing

positive, and fatigue being mention the most. Dealing with a death of a co-worker at the end of last week has also been a “cherry on top” for several of our employees.

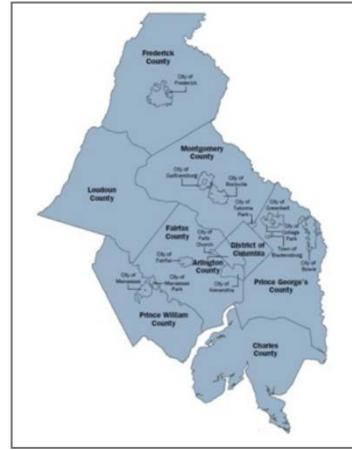

Concerns:

Some employees are genuinely struggling with coming to work. They love what they do, but they are scared. All the negative coverage of SagePoint has heightened fear as well as 2 co-workers being positive. As Courtney stated on Friday, employees have always viewed their station as a safe place (like home base), but now with Station 12 having so many positive cases (and possibly several came through the station while they were on quarantine), they no longer feel safe in their stations. This week we are going to work even harder to get around to our stations and making more calls to those off-duty. We will be putting together a small care package for employees to give them when we see them just to give them one bright moment. We are also going to be putting together something to take to the ones at home so they do not feel abandoned.

IEM's AI Modeling: Short-term COVID-19 Projections For MWCOG

Leveraging over 15 years of support to HHS for medical consequence modeling and our proprietary artificial intelligence (AI) models, IEM believes that our Coronavirus model outputs can be used to assist localities and their medical facilities to better prepare for an increase in hospitalizations, to better plan for and locate drive-through testing facilities, and to determine where increased levels of transmission may be occurring.

We have been refining our AI model over the past month and are now confident in its ability to provide accurate 7-Day projections of confirmed cases that can be used for operational and logistical planning. Additionally, we also provide projections for medical demand – hospitalizations, intensive care unit (ICU) care, and mechanical ventilation.

AI-based Model Background

IEM is currently using an AI model to fit data from various sources and project new cases of COVID-19. We do not assume the average number of secondary infections (R-value) stays the same over time. IEM's AI model finds the best R-value over time to evaluate how it changes over the course of the outbreak. The IEM modeling team is running ~11 million simulations to fit each jurisdiction's data for actual confirmed cases and using the best fit for the R-value to project new cases over the next 7 days. Any changes in the R-value are purely based on the confirmed case data and are not attributable to specific factors such as social distancing (although social distancing is a major factor). The AI models are executed on a daily basis to evaluate the changing dynamics of the COVID-19 pandemic. Our projections have typically been within 20%, and are often within 10%, of actual confirmed cases.

The projections shown in this document are based on data pulled in as of 4/19/20 5 a.m.

Please provide any feedback or send any questions that you might have to us. We are continually updating and improving the model, so your feedback is critical.

Also, if you have more current or refined data for your jurisdiction that you would like IEM to factor in, please let us know.

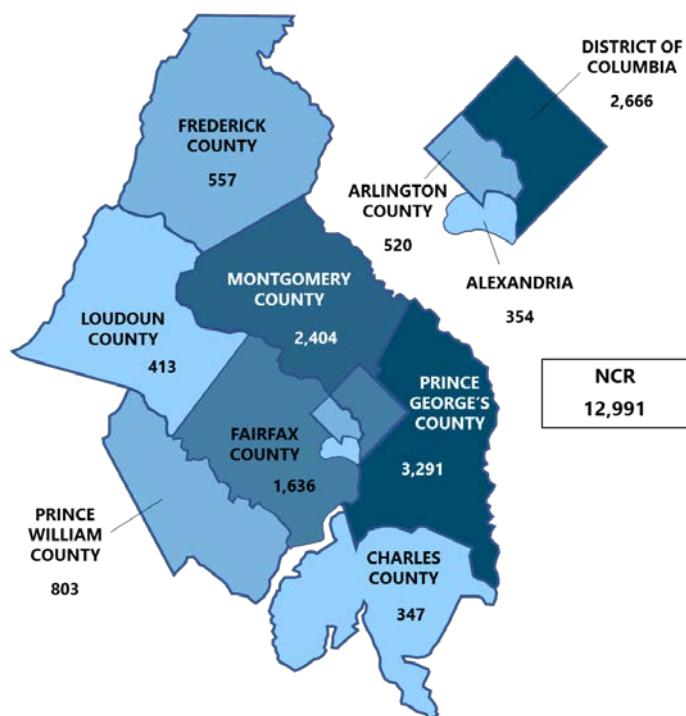

IEM's Modeling Lead

Dr. Prasith "Sid" Baccam is a **Computational Epidemiologist expert** at IEM with more than **20 years of experience in medical consequence modeling and simulation of disease outbreaks** and medical consequences following hypothetical attacks with biological agents or emerging infectious diseases. He develops key simulation models and decision support tools at IEM, specializing in public health, disaster response, and medical countermeasures (MCM) to enhance data-driven decision making and improve modeling assumptions.

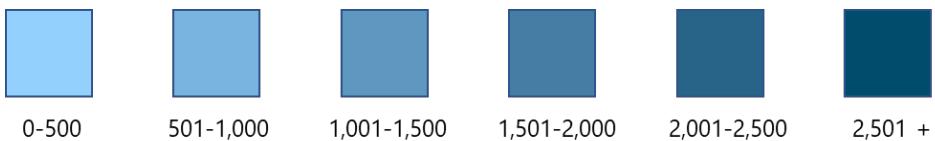

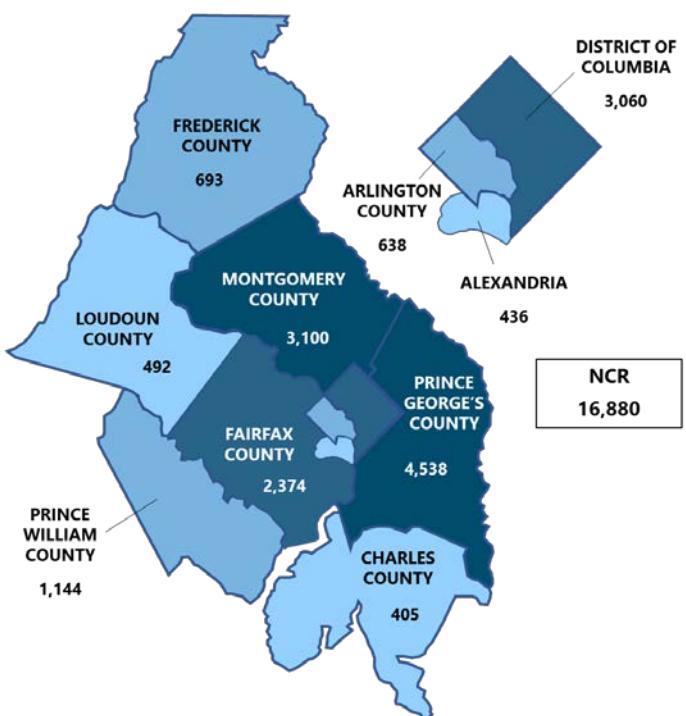

Upon receiving his **Ph.D. in Applied Mathematics and Immunobiology** at Iowa State University, Dr. Baccam worked as a Postdoctoral Research Associate at Los Alamos National Laboratory where he focused on researching viral and immunological modeling. After his stint at Los Alamos, Dr. Baccam has served as Task Lead in multiple public health projects have allowed him to develop expertise as a mathematical biologist and a leader on high-performance modeling and simulation teams.

He has worked with state and local public health officials as well as Federal agencies, including **HHS**, the Centers for Disease Control and Prevention (**CDC**), and the Department of Homeland Security (**DHS**). Dr. Baccam has published numerous papers on public health response models and implications on policy and has been invited to participate in workshops and symposiums held by the Institute of Medicine (now the National Academy of Health). His modeling results have been briefed to the **Executive Office of the President** and informed two presidential policy actions.

Some recipients of our daily COVID-19 short-term (7 day) projections have requested projections of demand for: hospital bed, intensive care unit (ICU) beds, and mechanical ventilation. We realize that different states and localities will have different characteristics for hospital demand of COVID-19 cases, and we are presenting the best assumptions we could find for those medical demands based on scientific literature and health data reporting. Specifically:

- **Beds:** For hospitalization, we use a range of 10% and 20% of cases require hospitalization based on CDC's report ([MMWR, March 18, 2020](#)) and state reports of COVID-19 cases.
- **ICU:** The CDC report found that 24% of hospitalized cases require ICU care.
- **Ventilators:** Based on clinical data from China and state reports, we assume that 50% of ICU cases require a ventilator.

If you have other estimates for these assumptions, please share them with us as we work to refine our modeling, assumptions, and data on a daily basis.

The medical demands shown in the table assume 20% of confirmed cases require hospitalization. To get the medical demand for the assumption that 10% of confirmed cases require hospitalization, simply divide the demand by 2. If you have your own jurisdiction-specific percentages, those can be applied to the projected cases to derive your own medical demands. Likewise, you can apply your own jurisdiction's demographics information to the projected cases to estimate impacts on subpopulations within your community (such as people over the age of 65 years).

Medical Demand Projections:

	Actual Confirmed Cases On:				Projected Cases (Hospitalized) [ICU] {Ventilator} For:			
	4/15	4/16	4/17	4/18	4/20	4/22	4/24

For additional information from IEM, please contact Bryan Koon, Vice President of Emergency Management and Homeland Security at bryan.koon@iem.com or 850-519-7966 or Stephanie Tennyson at stephanie.tennyson@iem.com or 202-309-4257.

Intelligence Briefing 4-20-2020
COVID Charles County

Updated Infection Numbers: As of 0838 hrs.

Total worldwide: 2,420,439 **+74,806** since the 4-19-20 brief.

Worldwide increase of confirmed cases by 24-hour period over the last 10 days

4-9/10	4-10/11	4-11/12	4-12/13	4-13/14	4-14/15	4-15/16	4-16/17	4-17 to 19	4-19/20
120,662	95,648	85,648	69,285	134,855	65,338	80,985	99,539	164,125	74,806

Total fatalities worldwide: 166,205 **+4,943** since the 4-19-20 brief

Analysis note: The wild swings in worldwide confirmed case numbers and fatality numbers continue to illustrate the lack of consistent reporting channels. These number should not solely be used to gauge the scope and magnitude of the current situation.

Total confirmed cases in the US: 759,786 **+24,499** since the 4-19-20 brief

US increase of confirmed cases by 24-hours period over the last 10 days

4-9/10	4-10/11	4-11/12	4-12/13	4-13/14	4-14/15	4-15/16	4-16/17	4-17 to 19	4-19/20
33,958	35,284	28,520	28,326	54,634	27,062	38,764	31,493	63,794	24,499

Analysis note: The US case number increases have remained relatively unchanged for the last 10 days. However, this is likely not an indication of “flattening the curve.” As the data is reviewed, keep in mind we are reporting an additional 28 to 33,000 NEW cases each day. We have yet to see any dramatic decreases in diagnoses new cases.

Total fatalities in US: 40,683 **+1,593** since 4-19-2020

Maryland Numbers: As of 1000 hrs. via <https://coronavirus.maryland.gov/>

Total confirmed cases in State in of MD: 12,830 **+522** since the 4-19-20 brief

Total tested in the State of MD: 55,061 **+1,999** over 4-19-20

Percent of those test that test positive: **23.3%**

Analysis note: Maryland percentage of positive test is now on par with PA, MA, IL, MI, CA and LA.

Total Fatalities in State of MD: 486 **+23** change since the 4-19-20 brief

Number of probable deaths: 62 (this is new statistic)

Total Hospitalizations: 2,886 **Increase of 129** from 4-19-2020

First Responder Numbers in Charles County:

52 Quarantine: means exposed and they can't come to work. **+15** since last report

12 Self Isolation: means sick or tested positive -6 since last reported

Today's numbers are a culmination of much hard work in collecting and synthesizing a tremendously amount of data. The accuracy of these numbers should not be in question moving forward.

Note: 4-17's numbers were reversed.

Weather:

Tuesday 66-37 rain, Wed. 60-42 sun, Thursday 64-53 rain

Local:

No stores were visited this am.

Analysis note: Beef, poultry, and pork plants continue to close at an alarming rate. This will put pressure on the meat market and likely cause a run on store inventories as the press continues to cover these closures.

Nursing home and assistant living patients and staff make-up over 1/3 of the total number of positive cases reported in Charles County.

Maryland Update:

A largely civil protest occurred at the MD state house on Sat.

The once closed Laurel Medical Center will open this week. They will have 3 floors for COVID patients

Region:

Over 13,817 cases in the NCR as of 0500 4-20-2020,
21,281 cases in Maryland, DC, and Virginia as of 1100 on 4-17-2020.

DC Convention Center being prepped to act as a field hospital. 50 beds have arrived. 250 more are due by this week.

National:

Protests grown across the nation

Beaches open in Florida

Local critical infrastructure:

No outages or disruptions are reported or are appear to be likely as of today.

Predictions/ Analysis:

- Protests over the continuing of stay at home orders, and business closures are becoming more prevalent and boisterous. Law enforcement should begin to make plans on how to track these groups and respond to events.
- First responder staffing and exposure issues will likely continue to increase. Priority messaging about PPE, manpower reduction strategies, and outside the box thinking should be continued and solutions expedited.
- FOIA and PIA requests for detailed records on infections in assisted living and nursing homes will increase as investigative reporting on this issue increases.
- Grocery stores could become a hotbed of fear and anxiety due to limiting numbers of patrons, assigning shopping days, mask requirements, and now limited meat supplies.
- As critical case in Charles County remain low (outside of nursing homes and assisted living homes), needs in other local jurisdictions are growing. Resources should be prioritized and plans should be made to share/deploy critical resources, personnel, and/or facility space to meet the needs regionally.
- The longer this crisis continues the more likely we are to experience critical events that may not be related to the COVID crisis (incidents within the incident). Those in leadership positions need to be prepared to step into dual leadership/managerial roles at a moment's notice. This requires taking care of yourself and staying up on the latest tactics, strategies and knowledge.
- Planning for crisis recovery starts as soon as the crisis begins. Monday marks the 8th weeks of this crisis, 6th week of schools being closed. Partners and stakeholders should begin planning for what the return to the “new normal” looks like in their organization. Sharing of these plans will help each organization build more comprehensive processes.
- Over the weekend the US will likely eclipse 500,000 cases and 15,000 deaths. Md numbers will likely pass 5000 and 150 fatalities by Friday. These numbers will cause increased pressure to ratchet up rhetoric re: “stay at home orders” and could result in further sanctions and restrictions.
- As the confirmed case numbers continue to rapidly ascend the likelihood of jurisdictions issuing “travel bans” increases. Law enforcement should begin researching the constitutionality of these potential edicts and have plans in place for implantation and begin to develop a public communication strategy. Standardizing local “travel authorization documentation” should be explored by the lead jurisdiction having authority.
- Due to diverted attention, the international and domestic terrorism threat is rapidly increasing. Responders should be reminded to remain vigilant and of the DHS guidelines for spotting suspicion activities and terrorism indicators.
- As we enter into the reported peak of this situation communication, along with sharing of individual branch capability and capacity is more important now than ever. “We don’t know what we are going to need to know until we need to know it.”
- First responder organizations should begin surveying members for pre-existing conditions and other complicating medical conditions. Responders found to have pre-existing conditions should be placed in limited citizen contact roles.

- A review of the 179 countries that report COVID-19 cases, only two (South Korea and China) have somewhat “flattened the curve” of NEW infections. Both showed flattening roughly 30 to 45 days after the initial spikes. The initial spike in the US began around 3-18-2020.
- Reduced stability in the supply chain along with increased fear and anxiety can be expected with today’s “stay at home order.”
- After 3 weeks of social distancing and schools being closed non-english speaking communities within Charles County are likely feeling further isolated due to a lack of language specific communications. Direct and increased messaging to Spanish speakers is likely necessary.
- As mass transit continues to shrink in availability, plans should be made to ensure those who rely on it for essential supplies and trips have delivery resources.
- LE and EMS screening protocols should include questions about recent travel to NY, NJ, CT, and FL.
- Immediate attention is needed to direct companies and organization on the proper processes and appropriate contact to use (Donation Manager at the EOC) to donate PPE and cleaning materials to essential personnel
- The next 7 days will likely see a stabilization of a majority of the grocery supply chain. However, the potential for disruption moving forward continues to remain high.
- FOIA and PIA request from media and citizens groups will likely begin to increase the longer this event lasts. “New normal” processes need to be established as soon as possible.
- Lack of child care options will likely add to family stress. Additional resources, activity and options are needed.
- JIC staff should substantially amplify community resource communications
- As we enter the 2nd week of social distancing stress, anxiety, and fear will likely increase. Continuous reminders of patience and focusing on kindness will become increasingly important.
- Many stores restock overnight. Seniors and the vulnerable populations should be strongly encouraged to shop during the early morning hours when supplies are likely to be at their highest.
- As testing increased the confirmed cases in MD will increase. This will likely cause additional life restrictions.
- Supply chain issues will continue and likely increase as further life interruptions and travel restrictions are ordered. The possibility of violence increases as stress increases, especially at grocery stores.
- Commanders of responders and essential staff should have robust plans for potential quarantines and updated continuity of operations including plans for diminished manpower. Further, responder organizations should begin reviewing existing integration plans with the National Guard.
- Obtaining medical supplies and PPE will continue to be an issue for the foreseeable future. All services should use the command ordering process so orders can be tracked.

- The community of Charles County is showing increased signs of pulling together and assisting one another. The JIC should continue to encourage civility and increase positive press of good news stories occurring throughout our community.

“The most effective leaders in crises ensure that someone else is managing the present well, while focusing their attention on leading beyond the crisis toward a more promising future”

Re: Volunteer Fire/EMS Brief

Items Being Worked On:

- Reduction of Force Policy – *Information gathering occurring.*
- Station Health Screening Policy – *Completed*
- PPE Burn Rate / Inventory - *Completed*

Stations/Apparatus:

- No Contaminations issues at any Stations.
- No Apparatus with any contamination issues.
- No Service Deliverability Issues with Apparatus O.O.S.

Personnel - 26 Members across 3 Stations (6 Positive / 5 Negative):

- Fire Station 3 – 1 Member in 14 Day Isolation – Tested Positive 4/16/2020
- Fire / EMS Station 11 - 2 Members -2 Due to Family Members being Quarantined
 - o - 3 Members Due to potential exposure from another patient.
- Fire / EM Station 12 – 20 members due to a Positive Member in the Station (Currently 5 Positive/5 Negative)

Incidents/Call Volume:

- No Major Incidents to Report related to COVID-19
- Increase of Responses to SagePoint over the past 7 days.
- Yesterday's EMS Call Volume was average, and Fire Call Volume was below average

56 Ems Related Incidents ----- 15 Fire Related Incidents

Other Information:

- Working on Topics for Upcoming Podcast
- Pushed out information about Social Distancing in the Stations.
- New PPE Burn Rate Tracking tool created and set to start using next week.
- Continue to push out Peer Support Information.

Overview of Program

- The Maryland Department of Aging and the Department of Health have implemented a new statewide **Caregiver Services Corps (CSC)**, with the goal of enabling older adults to remain safely in their homes and giving them piece of mind that they have support systems in place to do so.
- The objectives of the service include:
 - Providing back-up support to informal caregivers of older adults (family and friends) who are unable provide care, due to an illness, expanded job responsibilities or other temporary constraints.
 - Providing easy access to caregivers and support services for older adults who have found they need help with everyday life tasks.
 - Preventing hospitalizations of older adults that may be a result of lack of needed care in their homes.
- Older adults and their caregivers can access the service by dialing 211. The 211 operators will transfer the caller to the **CSC** call center.
- The **CSC** call is staffed with highly trained specialists who are available 24/7 to quickly evaluate care needs for older adults and identify caregivers and other the resources to deploy to their homes.
- Additionally, first responders who identify needs in the homes of older adults can connect to the command center by calling 800-337-8958.
- The service is to be used for immediate needs and if there are ongoing needs those services will be arranged as well.

Charles County Public Schools Briefing 4-20-2020
COVID Charles County

48-hour Priorities:

- Maintaining instructional continuity
- Expanding and maintaining food service
- Expanding and maintaining WiFi service

Meals:

No meal distribution over the weekend.

Last week CCPS distribution of meals for the week "unofficially" is 26,864 meals served, quite impressive for the shortened four day week. Meals served to Charles County students since March 16 total 129,559. We will continue with packet pickup at the 11 meal sites this week.

Closure:

Maryland State Superintendent of Schools Dr. Karen Salmon extended the statewide school closure to Friday, May 15. Charles County Public Schools (CCPS) now remains closed through May 15. All schools, buildings and centers will remain closed to the public.

Instruction:

Friday, 4/24/20, is the last day for parents and students to request a laptop for their child.

Community Wifi:

All four sites are up and running and seeing use. CCPS in process of 3 other additional WiFi sites.

Misc:
