

COVID-19 Guidance for Charles County

Maryland Department of Health
Charles County Health Department

31 August 2020

Phase 2 Maryland Strong Recovery

Resilience

“And once the storm is over, you won’t remember how you made it through, how you managed to survive. You won’t even be sure whether the storm is really over. But one thing is certain. When you come out of the storm, you won’t be the same person who walked in. That’s what this storm’s all about.” —*Haruki Murakami*

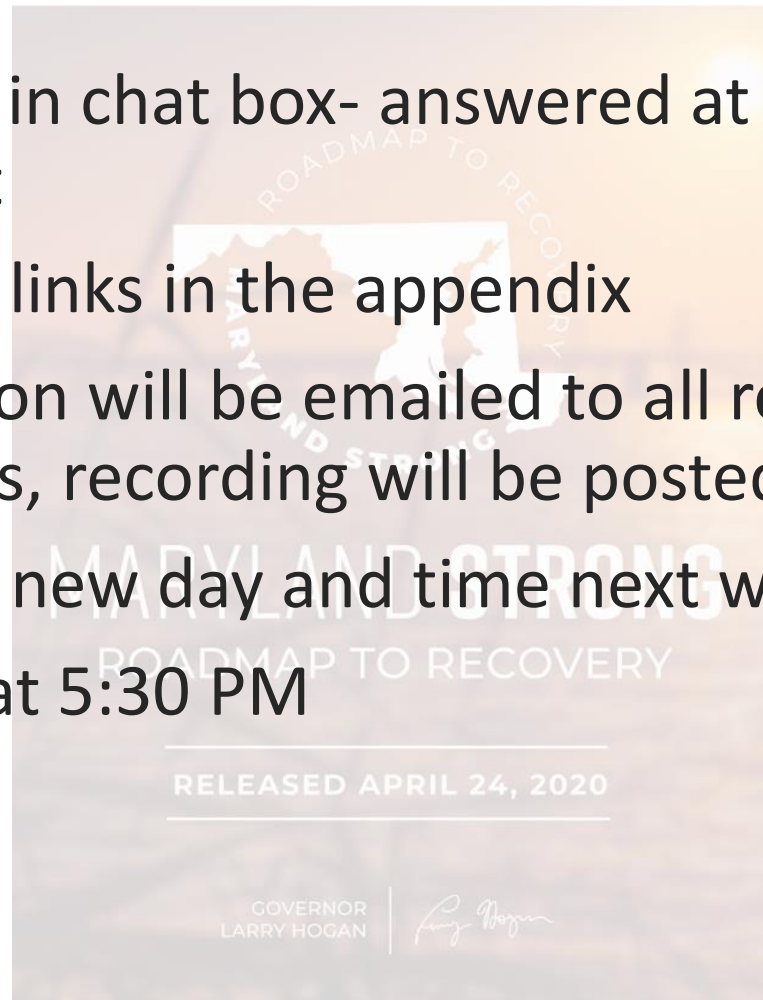

RELEASE

GOVERNOR
LARRY HOGAN

Housekeeping

- ❖ Questions in chat box- answered at the end, please be succinct
- ❖ Resources links in the appendix
- ❖ Presentation will be emailed to all registered participants, recording will be posted
- ❖ Moving to new day and time next week-
- ❖ Mondays at 5:30 PM

Agenda

❖ Phase 2 Recovery- What's Important Now

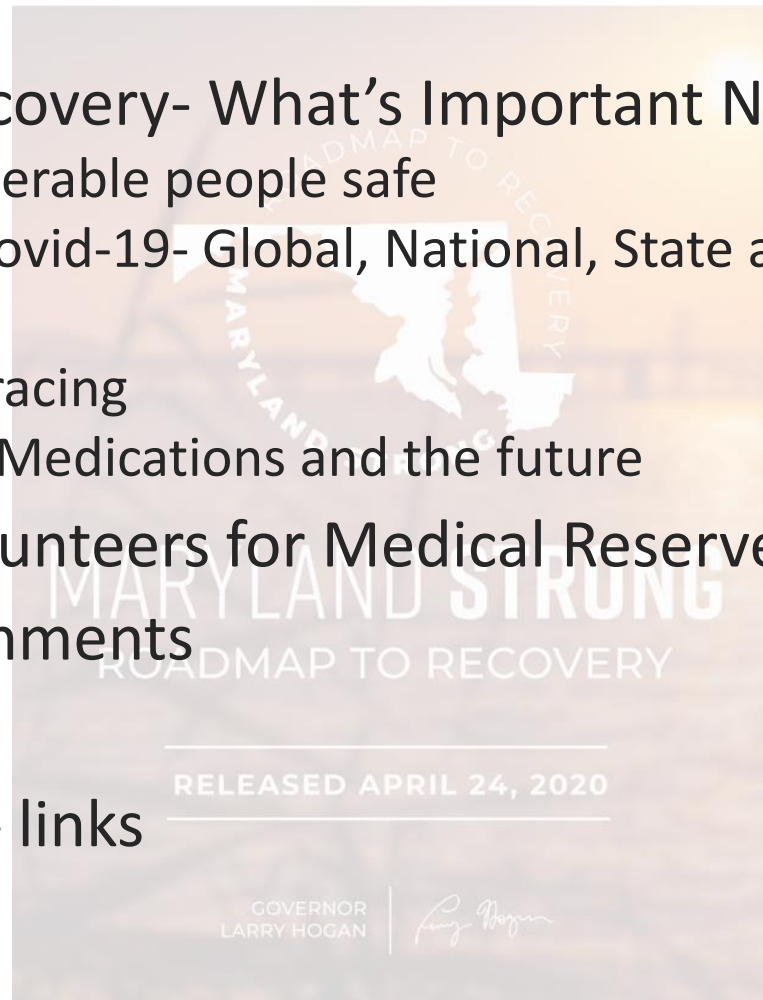

- Keep Vulnerable people safe
- Data on Covid-19- Global, National, State and Charles County
- Testing
- Contact Tracing
- Vaccines, Medications and the future

❖ Seeking volunteers for Medical Reserve Corps

❖ Closing comments

❖ Questions

❖ Resources- links

The basic and essential plan to safely get through the pandemic

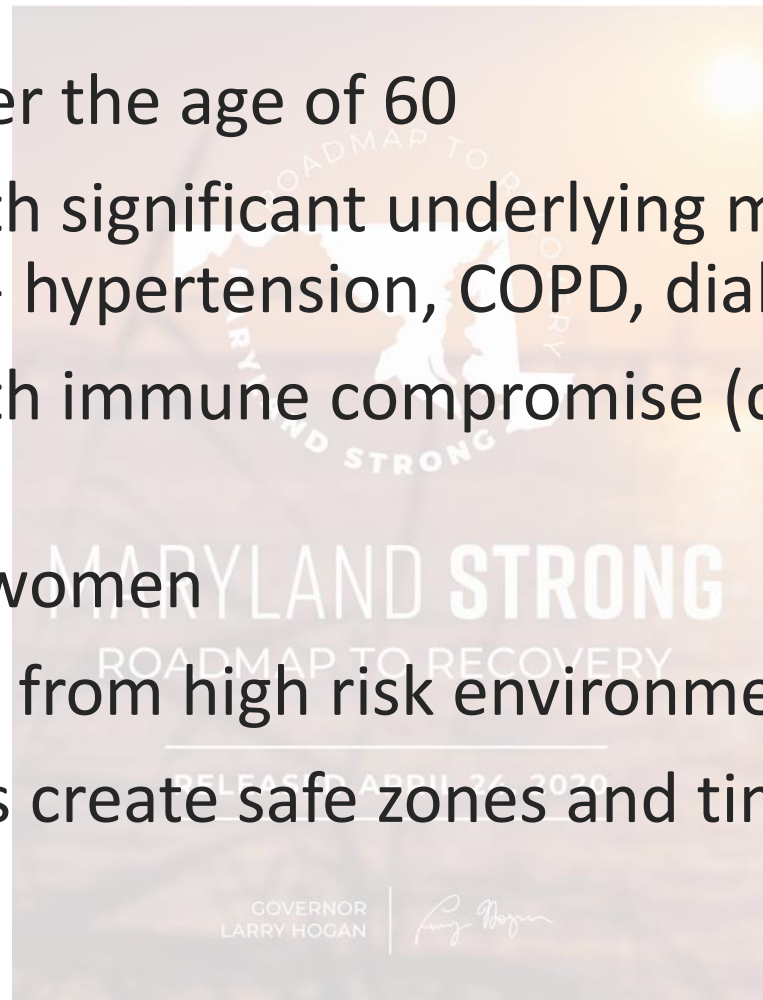

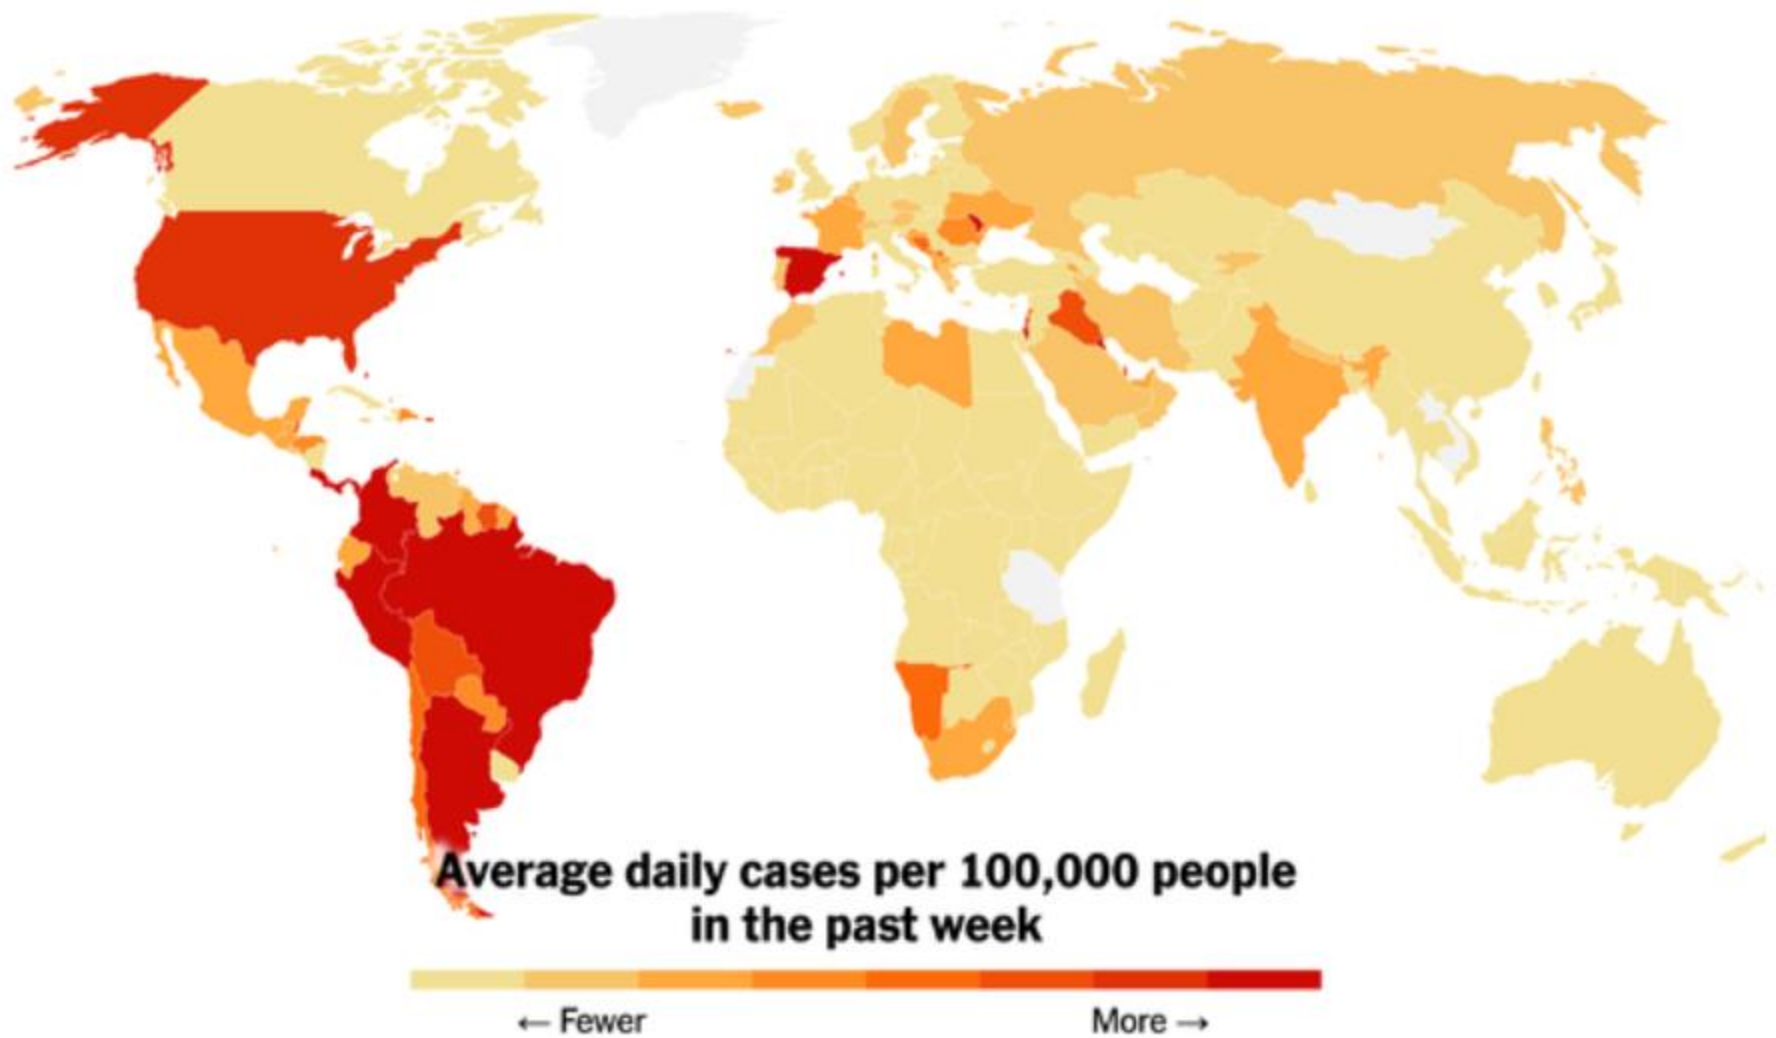

**Hand Hygiene-Face coverings- Social distancing- Screen and Test
Safer at Home**

GOVERNOR
LARRY HOGAN

Harm Reduction for Vulnerable Populations

- ❖ People over the age of 60
- ❖ People with significant underlying medical conditions- hypertension, COPD, diabetes, obesity
- ❖ People with immune compromise (cancer therapy, etc)
- ❖ Pregnant women
- ❖ Stay away from high risk environments
- ❖ Businesses create safe zones and times

Statewide Acute/ICU Beds Occupied by COVID Patients

Cases and Rates by County of Residence

Daily Cases by Specimen Collection Date

Daily Deaths

All case-related counts on this dashboard are of individual people infected with COVID-19.

Report date: the day a case was reported to the Maryland Department of Health.

Specimen date: the day the initial lab specimen was collected.

BMA: Baltimore Metro Area; NCR: National Capital Region; DMV: DC, Maryland, and Virginia Area

Rates calculated using total confirmed cases and 2019 population estimates. Rates do not include recovered cases. Rates are calculated as cases per 100,000 population. 2019 Maryland Population estimates from the Maryland Department of Planning, March 2020.

*Daily case increase uses report date.

**Positivity calculated using a 7-day rolling average

***DMV Virginia includes Alexandria, Arlington, Fairfax, Fairfax City, Falls Church, Loudoun, Manassas, Manassas City, and Prince William.

Maryland Daily Positivity Rate

Social Distancing

Social distancing

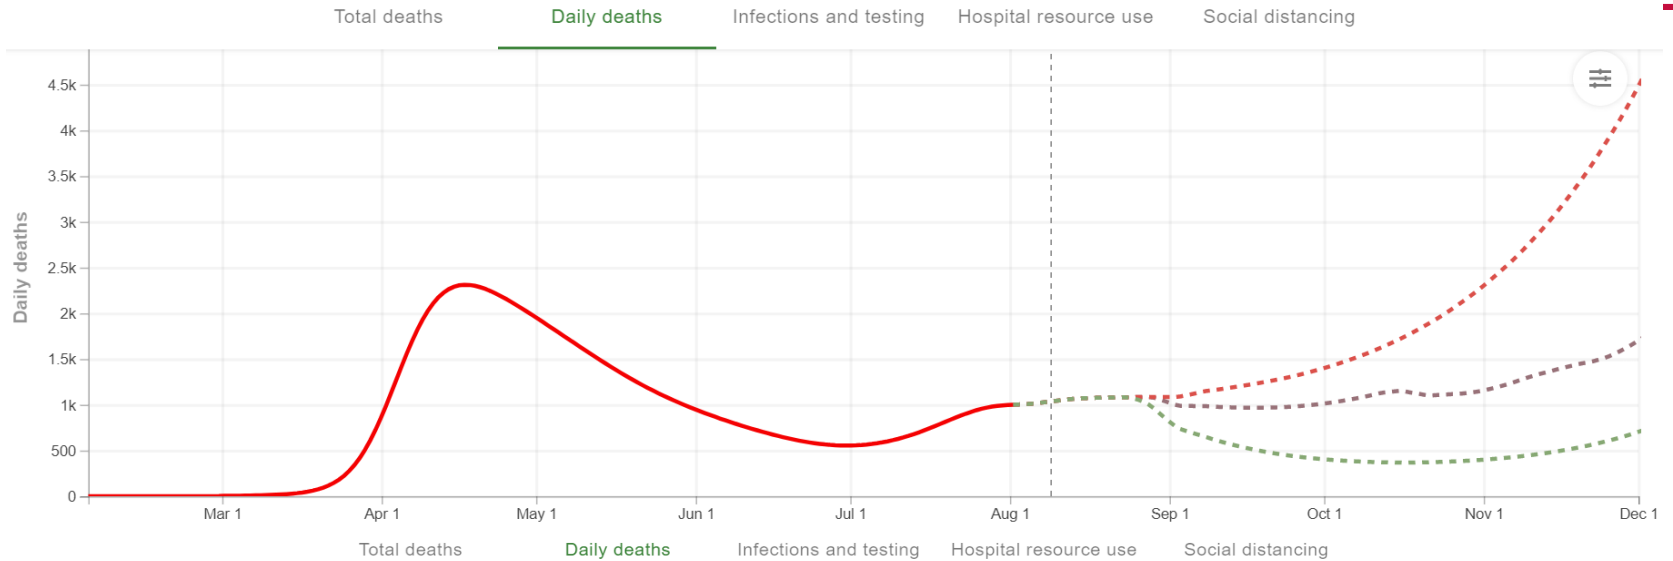

Reducing human contact (as measured by cell phone **mobility** data) can drive down infections so that mask use, testing, isolation, and contact tracing can work to contain the virus.

Percent of Population Tested for COVID-19 in Maryland Counties

Data reported as of 8/30/2020

Why Test?

- ❖ To know who are the asymptomatic carriers
 - So that they will not unknowingly infect others
- ❖ To know who are the pre-symptomatic carriers
 - So that they will not infect others
- ❖ To know if you are not infected after travel
- ❖ To know if you are not infected after exposure
- ❖ To know if your employees are infected
- ❖ For peace of mind
- ❖ This is the only way we can stop the spread of this virus

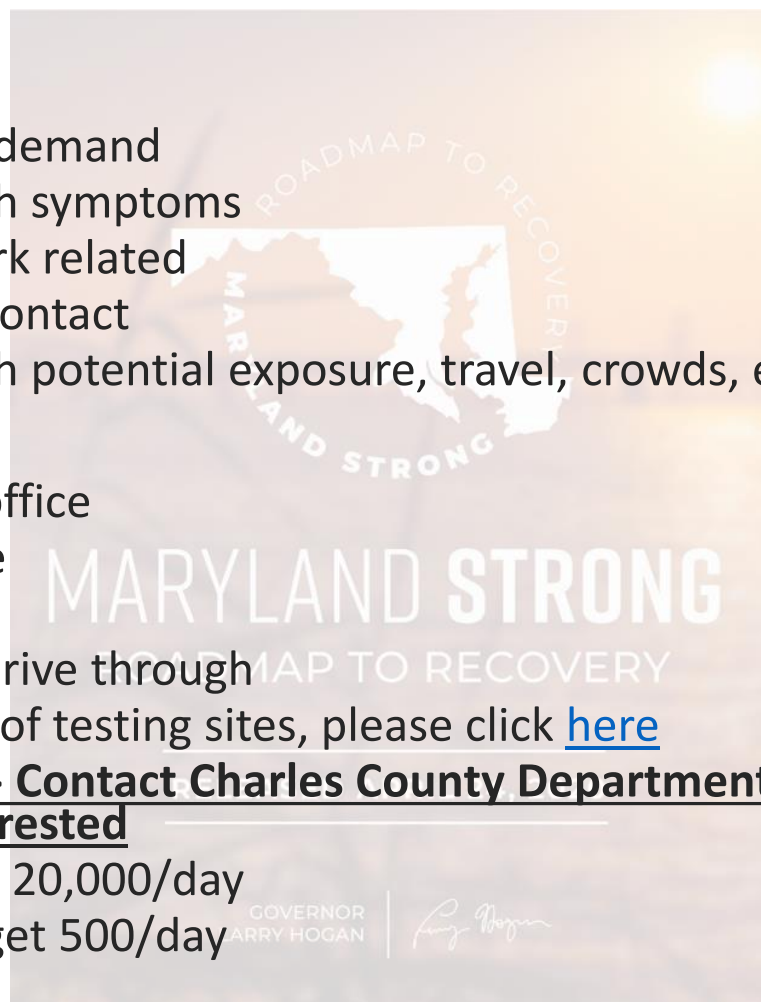

Who and Where to Test

❖ Who to test

- Anyone on demand
- Anyone with symptoms
- Anyone work related
- Anyone in contact
- Anyone with potential exposure, travel, crowds, etc.

❖ Where to test

- Provider's office
- Urgent Care
- VEIP site
- Pharmacy drive through
- Current list of testing sites, please click [here](#)
- **Businesses- Contact Charles County Department of Health at 301-609-6900 if interested**
- State target 20,000/day
- Charles target 500/day

Testing is Easy, Painless and Free

- ❖ Self administered nasal swabs
 - Easy
 - Painless
 - Free to you
- ❖ Drive through at VEIP
 - With or without provider orders
- ❖ Drive through at pharmacy
- ❖ Go to your doctor's office
- ❖ <https://coronavirus.maryland.gov/pages/symptoms-testing>

Contact Tracing to Limit the Spread of Virus

- ❖ If positive test expect a call
- ❖ Provide as much information as possible
- ❖ Self isolate with household members
- ❖ Support as needed- contact Health Department

GOVERNOR
LARRY HOGAN

CDC Update: Isolation Guidelines

- ❖ **Need to self-quarantine > everyone who has been in close contact with someone who has COVID-19**

(Includes people who've had COVID-19 and those who've taken an antibody test and have antibodies to the virus)

- ❖ **Close contact means:**

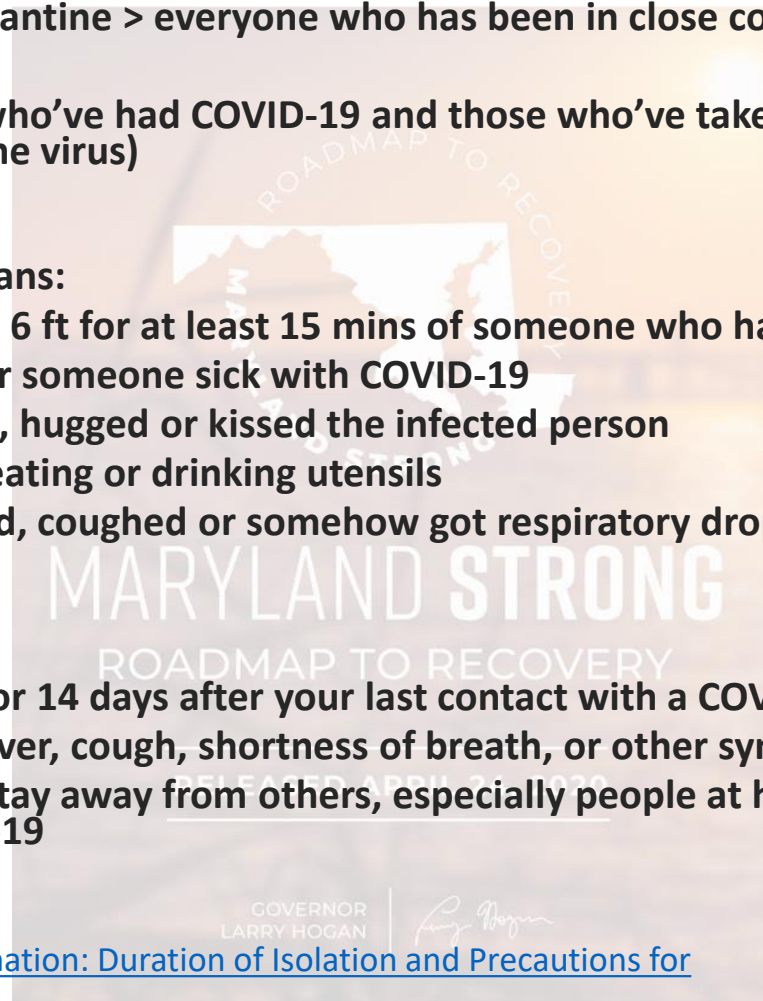

- **Being within 6 ft for at least 15 mins of someone who has COVID-19**
- **You cared for someone sick with COVID-19**
- **You touched, hugged or kissed the infected person**
- **You shared eating or drinking utensils**
- **They sneezed, coughed or somehow got respiratory droplets on you**

- ❖ **Do:**

- **Stay home for 14 days after your last contact with a COVID-19-infected person**
- **Watch for fever, cough, shortness of breath, or other symptoms of COVID-19**
- **If possible, stay away from others, especially people at higher risk of getting sick from COVID-19**

[Additional CDC information: Duration of Isolation and Precautions for](#)

26 [Adults with COVID-19](#)

Release from Isolation

❖ Duration of isolation and precautions

- For most persons with COVID-19 illness, isolation and precautions can generally be discontinued 10 days *after symptom onset*¹ and resolution of fever for at least 24 hours, without the use of fever-reducing medications, and with improvement of other symptoms.
- For persons who never develop symptoms, isolation and other precautions can be discontinued 10 days *after the date of their first positive RT-PCR test for SARS-CoV-2 RNA*.

❖ Role of PCR testing² to discontinue isolation or precautions

- Is no longer recommended except to discontinue isolation or precautions earlier than would occur under the strategy outlined in Part 1, above.

❖ Role of serologic testing

- Serologic testing should not be used to establish the presence or absence of SARS-CoV-2 infection or reinfection.

Risk of transmission

Low ■ Medium ■ High ■

* Borderline case that is highly dependent on quantitative definitions of distancing, number of individuals, and time of exposure

Gating Benchmark Metrics

“Stop Signs”

- An unexpected increase in hospitalizations or a sustained increase in cases requiring intensive care; and sustained increase in cases over a period of five or more days
- Increase in number of daily COVID deaths
- Indications that Marylanders are disregarding physical distancing guidelines
- Significant outbreaks of community transmission where contact tracing cannot establish the route of the spread

Compliance is a Complaint Driven Process

- ❖ Complaints from customers
- ❖ Complaints from employees
- ❖ Complaints from other sources
- ❖ Leads to Health Department on site education
- ❖ Health department order of immediate compliance
- ❖ Health department order for closure
- ❖ Enforcement by local and state police
- ❖ Contact 301-609-6733 or 301-609-6751 for complaints

| <u>X-Laser</u> | Howard | Laser light show systems | Face shields |

The image shows the cover of a document titled "Maryland Strong Roadmap to Recovery". The cover features a white silhouette of the state of Maryland on a circular background. The words "ROADMAP TO RECOVERY" are written in a semi-circle above the map, and "MARYLAND STRONG" is written in a semi-circle below it. The background of the cover is a blurred image of a sunset or sunrise over a body of water. A red horizontal line is drawn across the middle of the cover, passing behind the title text.

Employer and Health Care Provider Guidance on Return to Work

RELEASED APRIL 24, 2020

GOVERNOR
LARRY HOGAN

Employee Return to Work – Confirmed or Suspected COVID-19

1. Employee has suspected COVID-19 (suspected means the employee has symptoms* but has not been tested), or has symptoms and has tested positive.

*Symptoms include cough, shortness of breath or difficulty breathing, fever (subjective, or measured temperature of 100.4° F. or more), chills, muscle pain, sore throat, new loss of taste or smell, or gastrointestinal symptoms like nausea, vomiting, or diarrhea

2. Employee has confirmed COVID-19 (has had a positive laboratory test), but has had no symptoms.

Return to Work Based on Symptoms

The employee may return to work when:

- At least 3 days (72 hours) have passed fever-free without the use of fever-reducing medications; AND
- Improvement in respiratory symptoms (e.g., cough, shortness of breath); AND,
- At least 10 days have passed *since symptoms first appeared*.

At least 10 days have passed since the date of the first positive COVID-19 diagnostic test, and the employee has not subsequently developed symptoms since their positive test.

If symptoms develop, use Return to Work guidance in Category 1, above.

Note, because symptoms cannot be used to gauge where these individuals are in the course of their illness, it is possible that the duration of viral shedding (infectiousness) could be longer or shorter than 10 days after their first positive test.

GOVERNOR
LARRY HOGAN

Employee Return to Work – Exposed Employee

3. Employee has no symptoms, but:

- a) has a household member; OR
- b) has an intimate partner; OR
- c) is providing care in a non-healthcare setting without using precautions to an individual...

who has suspected or confirmed COVID-19.

Send employee home for a period of 14 days. If the employee develops no symptoms, the employee may return to work.

If the employee develops symptoms, the employee may return to work after these three things have happened:

- There has been no fever for at least 72 hours (that is three full days of no fever without the use of medicine that reduces fevers); AND
- Other symptoms have improved (for example, when cough or shortness of breath have improved); AND
- At least 10 days have passed since symptoms first appeared.

4. Employee has been within 6 feet for longer than 15 minutes with someone who has suspected or confirmed COVID-19.

Send employee home for a period of 14 days. If the employee develops no symptoms, the employee may return to work (note: if employee is essential worker in a critical infrastructure sector business, employee may return to work as specified in Category 6).

If the employee develops symptoms or is tested and confirmed to be COVID-19 positive, the employee may return to work under the conditions in as specified in Category 1 (if symptomatic), or Category 2 (if tested and found positive but has not developed symptoms).

GOVERNOR
LARRY HOGAN

Employee Return to Work – Unexposed, Critical Infrastructure Workers

5. Employee has been in the same indoor environment (e.g., a classroom, a hospital waiting room) as a person with suspected or confirmed COVID-19 for longer than 15 minutes but does not meet the definition of close contact (within 6 feet).

No work restrictions. Employee should self-monitor for symptoms, fever. If symptoms develop, self-isolate and return to work as specified above, depending on whether employee has symptoms or is tested (see Category 1).

6. **Employee has had close contact (6 feet or less for longer than 15 minutes) with someone who has suspected or confirmed COVID-19, AND is a Critical Infrastructure Employee**

If possible, employee should be off for 14 days. If not possible, employee may return to work with the following conditions:

- Employer should measure the employee's temperature and assess symptoms prior to them starting work. Ideally, temperature checks should happen before the individual enters the facility.
- As long as the employee doesn't have a temperature or symptoms, they should self-monitor under the supervision of their employer's occupational health program.
- The employee should wear a face mask at all times.
- Employee should maintain social distancing practices at all times.
- Regular cleaning and disinfection of work areas, especially "high-touch" areas.

GOVERNOR
LARRY HOGAN
