Apr 1, 2021 ~ COVID 19

	10,160 case records for Charles County in CovidLink to date. This data is a combination of data coming from CRISP, the MDH confirmed cases databases, and the data collected during the contact tracing interview/follow-up process. Of cases who reported having symptoms (48.4%)*, the most common symptoms were cough, congestion/runny nose, headache, muscle aches/pain, and loss of taste and/or smell. 4,682 cases reported having no COVID-19 symptoms (46.1%)*. *9,598 out of 10,160 cases reported whether or not they were experiencing COVID-19 symptoms. Due to this, these percentages will not add up to 100%. 853 required hospitalization*. Hospitalization rate is steadily decreasing. Peak in hospitalization rate coincided with the peak in the skilled nursing facility outbreaks in late April. *Due to a data reconciliation issue reported by Maryland Department of Health, COVID-19 hospitalization counts were not accurately captured in previous data reports. The number reported above it the accurate number of hospitalizations to date.
	177 confirmed deaths, 4 additional deaths since previous report; 1 death added from December 2020. There have been 177 confirmed deaths associated with COVID-19. This equates to 1.8% of total confirmed cases. The Charles County death rate of 1.8% is below the MD state average death rate of 1.9%. However, it should be noted that the majority of deaths in Charles County are associated with outbreaks in skilled nursing facilities. The death rate for Charles County is going down from a high of 7.3% now that the outbreaks at skilled nursing facilities have been contained and/or reduced. There are 2 probable COVID-19 deaths.
